PROFESSIONAL SUMMARY

BCA graduate (2026) with Python full stack development training. Proficient in Python, Django, Flask, REST APIs, MySQL, and Git. Actively uses GenAI tools (Claude, ChatGPT, Gemini) for code generation, debugging, testing, and backend service development. Experienced in prompt engineering, AI output validation, and agentic AI workflows. Strong understanding of OOP, HTTP concepts, web security, and cross-functional team collaboration. Seeking an entry-level Python Developer Intern role.

TECHNICAL SKILLS

Languages:	Python, JavaScript, HTML5, CSS3, SQL, Bash (Linux)
Frameworks:	Django, Flask, Bootstrap, jQuery, REST APIs, AJAX, HTTP
Databases:	MySQL, PostgreSQL, SQLite - schema design, CRUD, query optimisation
GenAI Tools:	Claude, ChatGPT (OpenAI), Gemini - code generation, debugging, prompt engineering, workflow automation, testing assistance
AI Skills:	Prompt engineering, AI output validation, hallucination risk awareness, agentic AI workflows, data sensitivity, AI security, prompt injection awareness
Dev Tools:	Git, GitHub, VS Code, Postman, Linux CLI, Chrome DevTools
Concepts:	OOP, MVC/MVT, Backend Services, REST API Design, Version Control, Testing, Performance Optimisation, Agile, Web Security, Concurrency Basics

EDUCATION

Bachelor of Computer Applications (BCA) AVS College of Arts & Science, Salem	2023 - 2026
Higher Secondary Certificate (HSC) - Science Stream St. Paul's Higher Secondary School	2022 - 2023

INTERNSHIP & TRAINING EXPERIENCE

Python Full Stack Development Trainee Livewire Institute, Salem	2025 - Present
- Building and maintaining backend services and internal tools using Python (Django, Flask) with clean, efficient, maintainable code. - Designing and consuming RESTful APIs; integrating third-party services; implementing MySQL/PostgreSQL schemas with CRUD operations. - Using GenAI tools (Claude, ChatGPT) for code generation, debugging, documentation, and automating routine development tasks. - Practising Git version control, testing, performance optimisation, and collaborative agile workflows.	
Python AI / ML Intern AI/ML Organisation	2024
- Built predictive models for image processing; integrated AI modules into production-ready backend services. - Applied GenAI tools (ChatGPT, Gemini) for research, data analysis, summarisation, and workflow automation. - Gained practical knowledge of AI limitations: hallucination risk, context window constraints, output validation, data sensitivity boundaries.	
Cybersecurity Intern Security Research Lab	2023
- Analysed live network traffic to detect malicious activity; authored incident reports and improved security protocols. - Gained awareness of AI security: prompt injection risks, data classification rules, sandboxed execution, and responsible AI data handling.	

KEY PROJECTS

Full Stack Web Application

Python | Django | Flask | MySQL | PostgreSQL | REST APIs | Git | HTML5 | Bootstrap

- Built responsive multi-page backend web application with user authentication, CRUD operations, REST API integration, and third-party service connections.
- Used Claude and ChatGPT for code review, debugging, and testing - validated AI output before deployment.

TalkEasy - Desktop Chat Application

Python | Tkinter | AES-256 Encryption | MySQL | QR Code | GenAI-Assisted Development

- Built WhatsApp-style desktop app with AES-256 encryption, QR-code authentication, and multi-tab UI.
- Used Claude and Gemini for architecture planning, prompt engineering, and generating reusable code templates for the project.

AI-Powered Data Dashboard

Python | Django | REST APIs | Data Visualisation | GenAI Integration

- Developed interactive dashboard with predictive modelling, real-time object detection, and automated AI report generation.
- Designed reusable AI prompt templates and agentic workflows for data summarisation - contributed to team-wide reusable skill repository.

SOFT SKILLS

Problem Solving | Clean Code | Cross-Functional Collaboration | Critical Thinking | Documentation | AI-Augmented Productivity | Adaptability | Time Management
